

Motivational letter for the representative council position

My name is Stanislav Galeev, I'm a foreign student from Russia and I'm applying for the position of representative council.

I have studied in Tallinn University only for 6 months by now and I find this educational institution proliferating. It has a good position in the world university ratings and it's shown in the quality of studies and the preparation of lecturers.

And in every university there's a council that is responsible for different events that make the studies not only fascinating but indulging.

And every council has another organization that controls the council itself. The organization that is responsible for the action of other organizations and has a clear desire to make the university life better.

That's why I'm applying to this place - I desire to make our university a better place where students can not only care about their studies but have a good university life itself.

Back at school I was the president of the school council that was responsible not only for all the events that took place in the building but also the organization process of lessons and sometimes the process of teaching itself.

I believe that I could bring/improve some aspects of our university life such as tolerance, friendship, command work, willing to make the process of studying better for everyone and of course understanding and desire to help our students and other organizations that has already put their foot in the history of our university.

In addition, I have a couple of friends that are members of TÜHI and I got a chance to see how they fulfill their duties and it amazes how they influence and change the process of our studies.

To recapitulate, I would like to add that if I got a chance to participate in the life of our university I would do my best to do all the duties that may befall me.

Sincerely yours, Stanislav Galeev
